

Environmental Policy

Endress+Hauser AB

Endress+Hauser AB is a supplier of products, solutions and services for industrial process measurement and automation.

We have the following Environmental policy:

Environment friendly actions are visible in all aspects of our work and are compatible with the global brand values of Commitment, Excellence, Sustainability and Friendliness.

Sustainability is an integral component of our organization's vision and supporting business strategies. Our customers use our products, solutions and services to improve their processes and thus their products sustainability as well as the environmental footprint from their production.

We also commit to ethical behavior, ethical sourcing, sustainability and corporate and social responsibility throughout our organization and ensure appropriate applicability to our partners and external service providers.

Endress+Hauser are dedicated to environmental friendliness and continuously strive to reduce environmental affect. With continuous work improvement we contribute to increase knowledge and awareness of environmental issues among employees and with measurable environmental targets we strive to have low impact on the environment.

Environmental aspects are recognized in our internal operations and each employee shares the responsibility to reduce environmental impact in daily actions. The importance of systematic planning of customer visits and waste management are highly prioritized.

The Endress+Hauser group uses our carbon emissions information towards calculating the entire environmental impact of the whole group of companies, which has achieved accreditation to the Eco Vadis Sustainable Supply Management scheme for corporate and social responsibility.
